## OIL AND GAS DIVISION

September 21, 2012

ATHLON ENERGY OPERATING LLC  
ATTN: REGULATORY DEPARTMENT  
420 THROCKMORTON ST SUITE 1200  
FORT WORTH TX 76102-3728

RE: **APPLICATION FOR EXCEPTION TO SWR 10**  
LEASE: WOODY '36'  
WELL NO. 6  
MARTIN COUNTY, DISTRICT 7C, TEXAS  
API NO. 317-37272

FIELD NAME	FIELD NO.	COMPLETION DEPTHS (FT)
SPRABERRY (TREND AREA)	85279200	8018-10600
PARKS (CONSOLIDATED)	69233125	10676-11177

**HYDROGEN SULFIDE RESTRICTION: NO**

The Commission has approved your application to down-hole commingle production within the above-referenced wellbore from the SPRABERRY (TREND AREA); and PARKS (CONSOLIDATED) fields in MARTIN County, Texas. For allowable and reporting purposes, the well will be assigned to the **SPRABERRY (TREND AREA)** field. It will be necessary to have or obtain Commission authority to complete this well in each of the subject zones (Form W-1 approval). The effective date of this SWR 10 Exception is September 21, 2012. This exception to SWR 10 will expire if not used within two (2) years from the date of this permit. This expiration date is September 22, 2014.

Acreage assigned to the referenced well for allocation of allowable shall not be assigned to any other well or wells projected to or completed in the above-referenced fields; such duplicate assignment of acreage is not acceptable, provided, however, that this limitation shall not prevent the reformation of development or proration units so long as no duplicate assignment of acreage occurs, and further, that such reformation does not violate other conservation regulations.

The maximum daily allowable for the combined production will be limited to the top allowable for the **SPRABERRY (TREND AREA)** field and will become effective upon receipt of Form W-2 showing combined completion data and results of a 24-hour production test taken after the physical work of down hole commingling has been completed. Please indicate in "remarks" the reason for filing this report, giving date of Commission approval of this Rule 10 exception.

Should secondary recovery operations be initiated in either of these reservoirs, it may be necessary to segregate these zones. If surface-commingling authority has been granted, it may be necessary to amend or cancel this authority.

Permit conditions:

The completion of the commingled well must be a reasonable match with the wellbore diagram filed with the application. Variances in completion depths are acceptable provided that these completion depths remain within the designated correlative intervals for the commingled fields. A copy of this wellbore diagram must be filed with the completion report for the commingled well.

Note: The distribution of this document will be by E-MAIL ONLY. E-mail sent to [annburdette@aol.com](mailto:annburdette@aol.com).

If you have any questions, you may contact the engineering unit in the Austin office at 512-475-2307.
